

RE: Shelf Life Statement

To Our Valued Customers:

All Electrochem primary lithium cells will maintain a low self-discharge rate of less than 3% per year, if they are stored at room temperature (20°C) or below. This means that at the end of a 10-year storage period, the cells will still provide over 70% of their original capacity.

Studies conducted by Electrochem on cell performance after many years of storage have been published in:

D. M. Spillman and E. Takeuchi  
Proc. 38<sup>th</sup> Power Sources Conference  
Cherry Hill, NJ  
pp. 199-202 (1998)

Sincerely,

Dr. Arden Johnson  
Research and Development Manager/Fellow Scientist
