1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND THE COMPANY/UNDERTAKING

GHS product identifier

Product Name LITHIUM BCX 85 CELLS AND BATTERIES

Other means of identification

UN-Number UN3090 (if packed in or with equipment use UN3091)

Synonyms Hermetically-Sealed Lithium Bromine Chloride in Thionyl Chloride Cells and Batteries

Recommended use of the chemical and restrictions on use

Recommended Use No information available

Uses advised against Do not short circuit or expose to temperatures higher than the maximum temperature rating specified by the manufacturer. Do not recharge, over charge or crush any cell or pack. Ensure cells and batteries are safely handled and stored. Review Section 7 completely before use.

Supplier’s details

Supplier Address Integer Holdings Corp.
2595 Dallas Pkwy #310
Frisco, TX 75034
TEL: 214-618-5248

Manufacturer Address Electrochem Solutions
670 Paramount Drive
Raynham, MA 02767
TEL: 781-830-5800

Emergency telephone number

Emergency Telephone Number 1-800-424-9300 (Chemtrec Account 24706)

2. HAZARDS IDENTIFICATION

Classification

This product is not considered hazardous by the OSHA Hazard Communication Standard 2012 (29 CFR 1910.1200). This product is an article which is a sealed battery and as such does not require an SDS per the OSHA hazard communication standard unless ruptured. The hazards indicated are for a ruptured battery.

GHS Label elements, including precautionary statements
Emergency Overview

Signal Word Danger

Hazard Statements
• Harmful if swallowed
• Toxic if inhaled
• Causes severe skin burns and eye damage
• May cause respiratory irritation. May cause drowsiness or dizziness

This is a battery. In case of rupture, the above hazards exist.

Appearance No information available. Physical State Solid. Odor None.

Precautionary Statements
Prevention
• Use only outdoors or in a well-ventilated area.
• Wash face, hands and any exposed skin thoroughly after handling.
• Do not eat, drink or smoke when using this product.
• Do not breathe dust/fume/gas/mist/vapors/spray.
• Wear protective gloves/protective clothing/eye protection/face protection.

General Advice
• Specific treatment (see supplemental first aid instructions on this label)  
• Immediately call a POISON CENTER or doctor/physician.
• Specific treatment (see supplemental instructions on the administration of antidotes on this label)

Eyes
• IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
• Immediately call a POISON CENTER or doctor/physician.

Skin
• IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
• Wash contaminated clothing before reuse.

Inhalation
• IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
• Call a POISON CENTER or doctor/physician.

Ingestion
• IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.
• Rinse mouth.
• Do NOT induce vomiting.

Storage
• Store in a well-ventilated place. Keep container tightly closed.
• Store locked up.

Disposal
• Dispose of contents/container to an approved waste disposal plant.
Hazard Not Otherwise Classified (HNOC)

Cells and batteries may be explosive if exposed to higher temperatures. Do not expose cells or batteries to temperatures above the maximum rated temperature as specified by the manufacturer.

Other information

12.5% of the mixture consists of ingredient(s) of unknown toxicity.

*The exact percentage (concentration) of composition has been withheld as a trade secret.

### 4. FIRST AID MEASURES

**Description of necessary first-aid measures**

**General Advice**

First aid is upon rupture of sealed battery:

**Eye Contact**

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a physician or Poison Control Center immediately.

**Skin Contact**

IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. If skin irritation occurs: Get medical advice/attention.

**Inhalation**

IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician.

**Ingestion**

IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. Rinse mouth. Do NOT induce vomiting. Never give anything by mouth to an unconscious person.

**Most important symptoms/effects, acute and delayed**

*Itching. Burning. Difficulty in breathing. Coughing and/or wheezing. Serious eye irritation or damage.*

**Indication of immediate medical attention and special treatment needed, if necessary**

Notes to Physician

Treat symptomatically.

### 5. FIRE-FIGHTING MEASURES

**Suitable Extinguishing Media**

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

**Unsuitable Extinguishing Media**

Use of water spray when fighting a lithium fire may be inefficient. However, copious amounts of water may be used to cool a battery fire and extinguish any surrounding combustible fires.

**Specific Hazards Arising from the Chemical**

The electrolyte will release toxic sulfur dioxide gas.

**Explosion Data**

Protective Equipment and Precautions for Firefighters
As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Personal Precautions
Avoid contact with skin, eyes and clothing. Ensure adequate ventilation. Use personal protective equipment. Wash thoroughly after handling. Refer to Section 8 for personal protective equipment.

Environmental Precautions
See Section 12 for additional Ecological Information.

Methods and materials for containment and cleaning up

Methods for Containment
Prevent further leakage or spillage if safe to do so and properly trained.

Methods for Cleaning Up
During a release, ensure the Personal Protection listed in Section 8 is worn. Neutralize any electrolyte contaminated surfaces with baking soda, soda line or sodium bicarbonate. Transfer damaged battery and any clean up materials to a sealed container a neutralizing material as stated above. Ensure the container is properly labeled.

7. HANDLING AND STORAGE

Precautions for safe handling

Handling
Do not crush, pierce, short circuit (+) and (-) battery terminals with conductive (metal) goods. Do not directly heat or solder. Do not throw into fire. Do not mix batteries of different types and brands. Do not mix new and used batteries. Keep batteries in non-conductive (plastic) trays. Cells or batteries that have been dropped or experience mechanical shock should be isolated and monitored for approximately 5 days to identify a possible internal short circuit and resulting fire. In case of rupture: Handle in accordance with good industrial hygiene and safety practice. Ensure adequate ventilation. Avoid contact with skin, eyes and clothing. Do not breathe vapors/dust. Wear personal protective equipment.

Conditions for safe storage, including any incompatibilities

Storage
Store at room temperature. Do not store in high humidity environments. Do not store near combustible or flammable materials. Never stack heavy objects on top of battery boxes. Keep batteries in original packaging until use and do not expose them to unnecessary or excessive handling.

Incompatible Products
Under normal use, batteries are not incompatible. The electrolyte is incompatible with: Strong acids. Strong bases. Strong oxidizing agents.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Control parameters

Exposure Guidelines
The following exposure limits are provided for information only; exposure is not expected under normal conditions of use or storage.

<table>

Appropriate engineering controls

Engineering Measures
- Showers
- Eyewash stations
- Ventilation systems

Individual protection measures, such as personal protective equipment

Eye/Face Protection
None required for normal handling of the finished product. If necessary to handle damaged product where exposure to the electrolyte is a possibility, chemical splash goggles and a face shield are recommended.

Skin and Body Protection
None required for normal handling of the finished product. If necessary to handle damaged product where exposure to the electrolyte is a possibility, chemically resistant gloves and apron are recommended.

Respiratory Protection
None required under normal usage. If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.

Hygiene Measures
Handle in accordance with good industrial hygiene and safety practice.

</table>
Viscosity: Not applicable unless there is exposure to an electrolyte.

Thionyl Chloride: ca. 0.6 mPas @ 25°C

Flammable Properties: Not flammable

Explosive Properties: Not applicable unless there is exposure to an electrolyte.

Oxidizing Properties: Not applicable unless there is exposure to an electrolyte.

Other information:

VOC Content (%): Not applicable unless there is exposure to an electrolyte.

10. STABILITY AND REACTIVITY

Reactivity

No dangerous reaction known under conditions of normal use.

Chemical stability

Stable under recommended storage conditions.

Possibility of hazardous reactions

None under normal use.
In the event of a leak or rupture: electrolyte and lithium will react with water.

Hazardous Polymerization

Hazardous polymerization does not occur.

Conditions to avoid

Ignitions sources - heat, sparks and open flames.

Incompatible materials

Under normal use, batteries are not incompatible. The electrolyte is incompatible with: Strong acids. Strong bases. Strong oxidizing agents.

Hazardous decomposition products

Lithium oxides, Sulfur dioxide, Hydrogen chloride, Bromine, Chlorine.

11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure

Product Information: Exposure is not expected for product under normal conditions of use. In the event of an exposure to electrolyte the following toxicological information is provided:

- Inhalation: Toxic by inhalation.
- Eye Contact: Corrosive to the eyes and may cause severe damage including blindness.
- Skin Contact: Irritating to skin.
- Ingestion: Harmful if swallowed.

Symptoms related to the physical, chemical and toxicological characteristics
Symptoms
Burning. Eye and skin redness, tearing, hives, blurry vision. May cause blindness.

Delayed and immediate effects and also chronic effects from short and long term exposure

Sensitization
No information available.

Mutagenic Effects
No information available.

Carcinogenicity
Contains no ingredients above reportable quantities listed as a carcinogen.

Reproductive Toxicity
No information available.

STOT - single exposure
Contains a component known to cause systemic target organ toxicity from acute exposure.

STOT - repeated exposure

Aspiration Hazard
No information available.

Target Organ Effects

Aspiration Hazard
No information available.

Numerical measures of toxicity - Product
Unknown acute toxicity
12.5% of the mixture consists of ingredient(s) of unknown toxicity.

The following values are calculated based on chapter 3.1 of the GHS document:

LD50 Oral
1182 mg/kg; Acute toxicity estimate

Inhalation
1655 mg/L; Acute toxicity estimate

gas

dust/mist
3.6 mg/L; Acute toxicity estimate

Vapor
26 mg/L; Acute toxicity estimate

12. ECOLOGICAL INFORMATION

Ecotoxicity
Avoid any release to waterways, groundwater, or any environmental media. Harmful effects due to pH shift are expected.

Persistence and Degradability
No information available.

Bioaccumulation
For Thionyl Chloride: Does not bioaccumulate.

Other Adverse Effects
No information available.

13. DISPOSAL CONSIDERATIONS

Waste Disposal Methods
This material, as supplied, is a hazardous waste according to federal regulations (40 CFR 261).

Contaminated Packaging
Do not re-use empty containers.

14. TRANSPORT INFORMATION

Note:
Lithium batteries shipped as "Lithium batteries", "Lithium batteries packed with equipment", or "Lithium batteries contained in equipment" may not be classified as "Dangerous Goods" when shipped in accordance with "special provision A45 of IATA-DGR" or "special provision 188 of IMO-IMDG Code". For Specific transport information for all variations of BCX cells, please review the Product Data Sheet. This can be sent upon request. Please contact the manufacturer.

Clean Water Act

This product does not contain any substances regulated as pollutants pursuant to the Clean Water Act (40 CFR 122.21 and 40 CFR 122.42).

CERCLA

This material, as supplied, does not contain any substances regulated as hazardous substances under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) (40 CFR 302) or the Superfund Amendments and Reauthorization Act (SARA) (40 CFR 355). There may be specific reporting requirements at the local, regional, or state level pertaining to releases of this material.

U.S. State Regulations

California Proposition 65

This product does not contain any Proposition 65 chemicals.
