

RECYCLING ELECTROCHEM BATTERIES

# Powerful recycling solutions for commercial and industrial lithium batteries

**WORKING IN PARTNERSHIP**

#### About Electrochem™

Electrochem is a leading provider of commercial power solutions specializing in critical applications where energy demands are high, operating environments are extreme, and the cost of failure is significant. Born from the first lithium battery invented for the implantable pacemaker, Electrochem embraces our heritage of quality, reliability and innovation.

#### About Veolia North America

Veolia North America blends skills in operations, engineering and technology with innovative business models, offering a complete range of environmental solutions to meet the challenges of cities, governments, campuses, businesses and industries.

### Background

Every year, billions of used batteries that may contain corrosive materials such as potassium hydroxide (lye) or sulfuric acid; reactive metals such as lithium; or toxic metals such as mercury, lead, cadmium and nickel are thrown in the trash. Batteries can contaminate our environment if managed improperly. Recycling batteries eliminates the risk of personal injury or loss of property and prevents pollution, thereby reducing the risk of future financial liability associated with improper disposal.

### Partnership

Electrochem™ has partnered with Veolia North America to offer a battery recycling program to help you recycle their customized rechargeable and non-rechargeable batteries. This partnership will provide you nationwide cost-effective solutions for large and small quantities of batteries, unbeatable customer service, on-time pickups, and the industry-leading environmental liability and protection.

### Recycling designed to fit your needs

We have developed recycling solutions for large and small quantities of batteries. Whether you need service for one facility or multiple locations across the country, we can offer a combination of mail-back, prepaid recycling containers for small quantities or arrange for a pick up for larger quantities.

### Packaging & transportation

**Please retain all original packaging for use in the shipment of spent batteries for recycling. This packaging meets all DOT requirements, is specific to the batteries you received, and is your best option to make recycling the spent batteries effortless.**

We offer an unmatched fleet of semi-trailers, box vans and approved third-party transporters to ship your waste to one of our four fully permitted recycling facilities. We'll even provide detailed packaging guidelines to ensure your batteries are packaged in accordance with DOT shipping regulations.

### How to get started. Email today!

Email us at [us.vna.erdbids.mailbox@veolia.com](mailto:us.vna.erdbids.mailbox@veolia.com) for a quote. Please include the quantity and types of batteries you are looking to recycle along with the location they need to be picked up from. Don't forget your contact information so we will be able to get back in touch with you.
